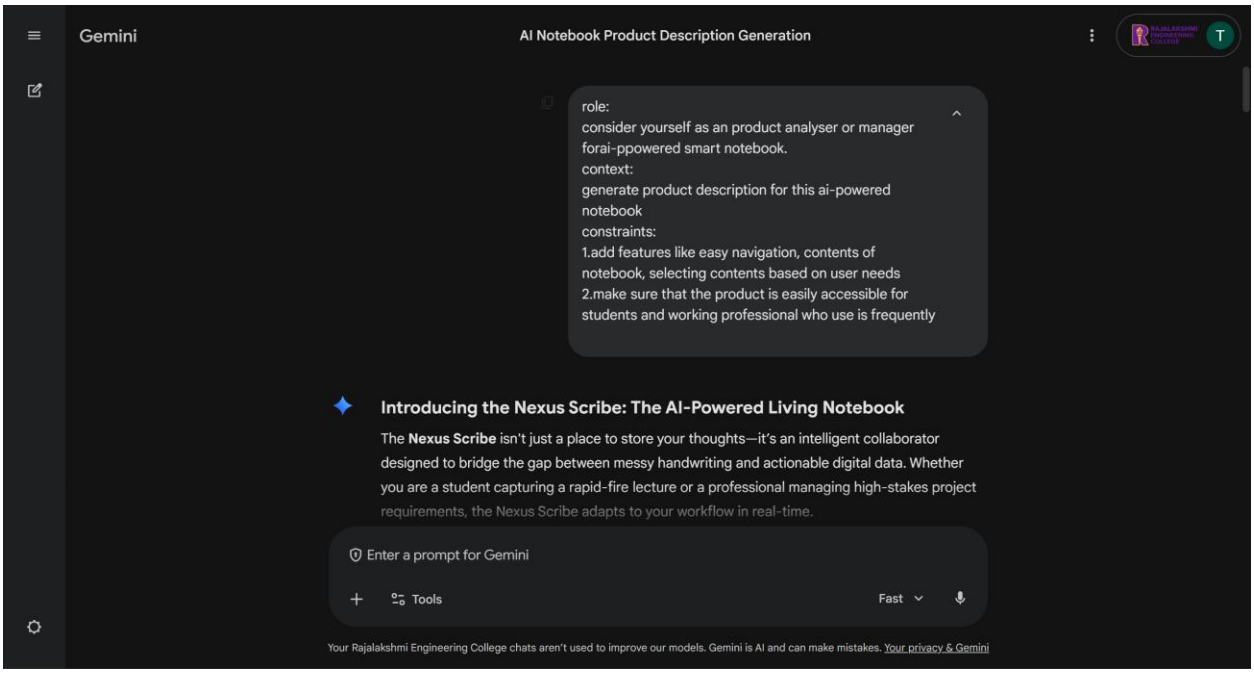
GENERATIVE AI MODEL LAB OUTPUT

1a : Prompt Generation



Introducing the Omnisync: The AI-Powered Living Notebook

The **Omnisync** isn't just a place to store your thoughts—it's an intelligent collaborator designed to bridge the gap between messy handwriting and actionable digital data. Whether you are a student capturing a rapid-fire lecture or a professional managing high-stakes project requirements, the Nexus Scribe adapts to your workflow in real-time.

Core Intelligent Features

- **Dynamic Semantic Navigation:** Forget endless scrolling. Our AI indexes your notes as you write. Simply search for "that marketing idea from last Tuesday" or "organic chemistry formulas," and the Scribe jumps to the exact stroke on the page.
- **Auto-Generating Table of Contents:** The notebook automatically categorizes your entries. It detects transitions between subjects and creates a live, clickable **Contents Dashboard** that updates every time you close the cover.
- **Contextual Content Selection:** Using **Smart-Select AI**, you can circle any portion of your notes to trigger specific actions:

    - *Professional:* Transform meeting scribbles into a polished email draft or a Jira ticket.
    - *Student:* Convert a diagram into a flashcard or solve a handwritten math equation instantly.
- **Haptic Feedback & OCR:** High-fidelity Optical Character Recognition (OCR) converts your unique handwriting into searchable text in over 30 languages, maintaining the original layout and formatting.

Designed for Your High-Speed Life

We've stripped away the friction of traditional digital note-taking to ensure the Nexus Scribe is as intuitive as paper but as powerful as a workstation.

Feature	For the Student	For the Professional
Accessibility	Instant sync to Canvas, Blackboard, and Notion.	Seamless integration with Outlook, Slack, and MS Teams.
Organization	Auto-tags notes by "Course Code" or "Exam Date."	Categorizes by "Client," "Project," or "Action Item."
Battery & Build	30-day battery life; built to survive a cramped backpack.	Sleek, executive aesthetic with biometric security locking.

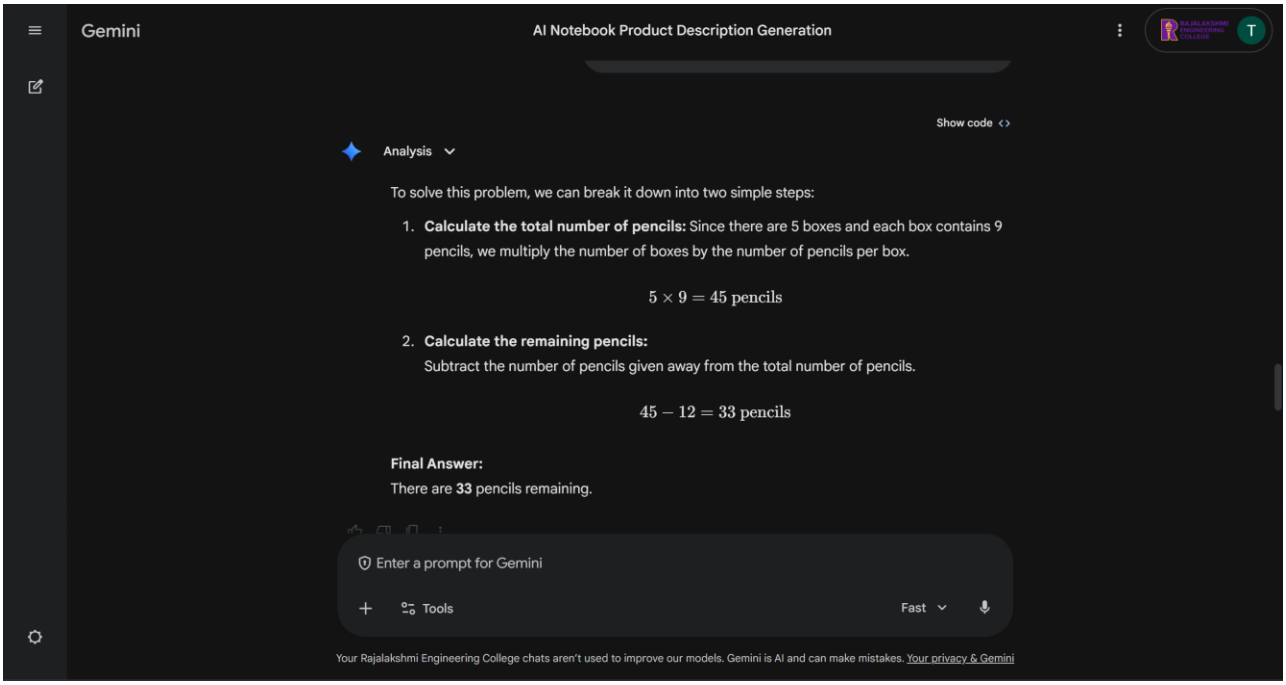
1b : PROMPT ANALYSIS

Zero shot prompting:

Prompt:

solve the following mathematical problem:

there are a total of 5 boxes each contains 9 pencils. 12 pencils are given away. How many pencils are remaining?



One shot prompting:

Prompt:

solve the following mathematical problem based on the given example:

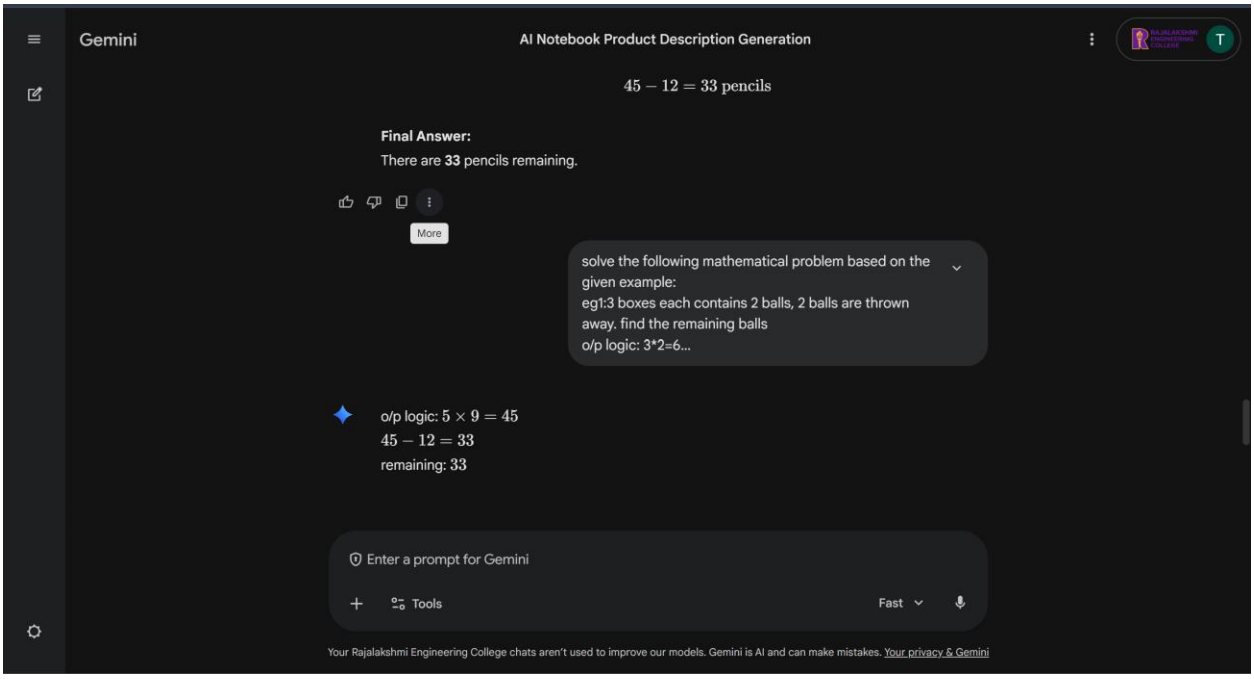
eg1:3 boxes each contains 2 balls, 2 balls are thrown away. find the remaining balls

o/p logic: 3*2=6

6-2=4

remaining:4

now solve:there are a total of 5 boxes each contains 9 pencils. 12 pencils are given away. How many pencils are remaining?



Few shot prompting:

Prompt:

solve the following mathematical problem based on the given example:

eg1:3 boxes each contains 2 balls, 2 balls are thrown away. find the remaining balls

o/p logic: 3*2=6

6-2=4

remaining:4

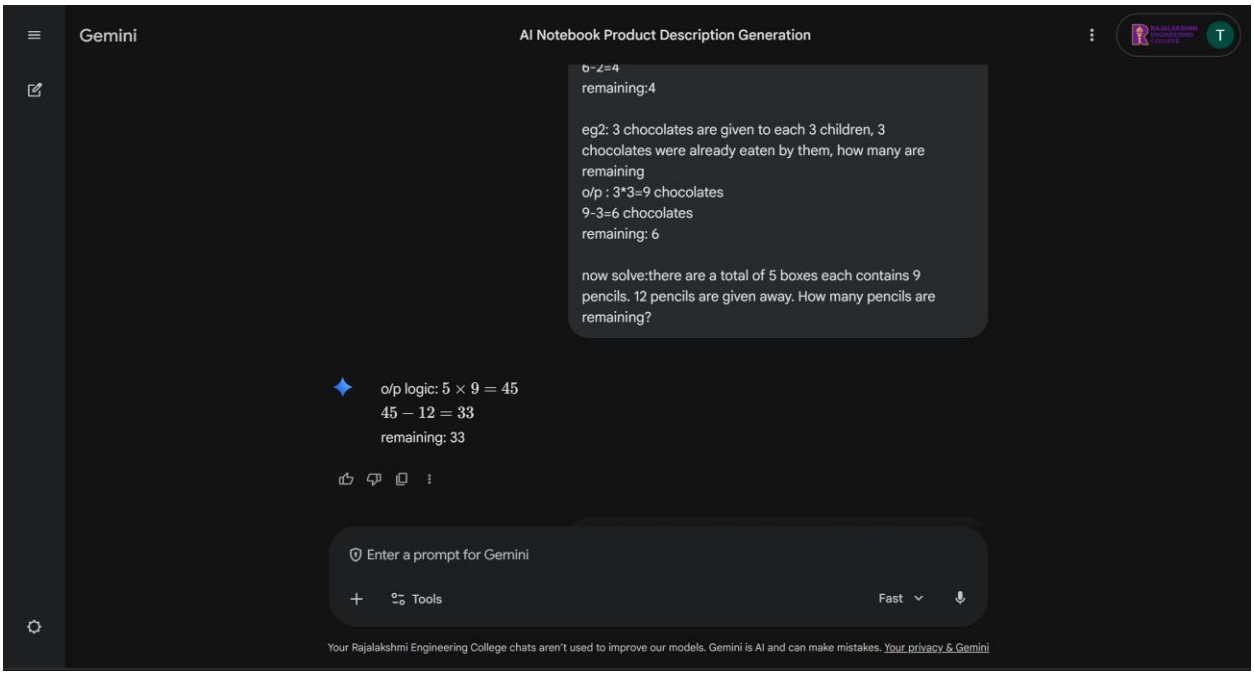
eg2: 3 chocolates are given to each 3 children, 3 chocolates were already eaten by them, how many are remaining

o/p : 3*3=9 chocolates

9-3=6 chocolates

remaining: 6

now solve:there are a total of 5 boxes each contains 9 pencils. 12 pencils are given away. How many pencils are remaining?



Chain of Thoughts prompt:

Prompt:

solve the following mathematical problem based on the given steps:

1.identify total number of boxes

2.tota pencils in each box

3.find total pencils overall

4.remove the give away pencils

5.return remaining value

question: there are a total of 5 boxes each contains 9 pencils. 12 pencils are given away. How many pencils are remaining?

Gemini

AI Notebook Product Description Generation

5.return remaining value

question:there are a total of 5 boxes each contains 9 pencils. 12 pencils are given away. How many pencils are remaining?

Based on the steps provided, here is the solution to your problem:

1. **Identify total number of boxes:** 5
2. **Total pencils in each box:** 9
3. **Find total pencils overall:** $5 \times 9 = 45$
4. **Remove the give away pencils:** $45 - 12 = 33$
5. **Return remaining value:** 33

Remaining: 33
